### RECASENS Fabrics

Maxxmora offers a broad scale of upscale, %100 solution-dyed acrylic fabrics with a gentle touch and stylish, sophisticated patterns. %100 solution-dyed acrylic has 7-8 colorfastness under exposure to ultraviolet rays and even open-air conditions. All acrylic fabrics have a surface process that enhances water and stain repellent parcels.

### Faux Leather

Faux leathers are favorably enduring for outdoor conditions and have resistance to stain, dirt, and other remainings. The composition of the artificial leather is 2% vinyl acrylic 78% polyvinyl chloride 22% Polyester and has 100,000 Martindale and fire retardancy properties.

MB-11 BEIGE	MB-12 GREY	MB-13 WHITE PRO	MB-14 BEIGE PRO	MB-15 GREY PRO

## BRAIDS

### Braids

Compactness is an essential concept for us in both levels of design and production. To guarantee the ideal shape and endurance against every possible external effect, we use UV-proof and %100 Solution Dyed Acrylic and combines them with the most suitable coating options.

## WOODS

MW-01 TEAK	MW-02 IROKO	<b>Teak &amp; Iroko</b>  Thanks to First Quality Burmese Teak, we can offer you long-lasting experiences in the outdoor spaces. As a nature-originated product, it is normal for teak/iroko to get small surficial cracks and to lose its color from golden brown to light silver within six months to two years due to the natural weather circumstances.
